GERMAN COOPERATION

German development cooperation is based on the principle of acting out of the ethical responsibility and international solidarity. It is thus guided by humanistic values.

As a collective term, development cooperation summarises the services of technical, financial and personnel cooperation. Development cooperation is a task for society itself performed by private and public institutions. Development cooperation services can be provided in material form (as loans or grants) or in immaterial form (for example, by providing know-how or training.)

AFRICAN GERMAN HEALTH ASSOCIATION

The African German Health Association e. V. wants to contribute to the sustainability and strengthening of the healthcare systems in Africa together with local actors. In doing so, the association works on a project-oriented basis to provide new impetus in both the digital and physical infrastructure in African partner countries with a focus on long-term success.

JOIN THE EFFORT

Together we are strong! The association invites all interested stakeholders from the public and private healthcare sector to participate in the activities, workshops, etc.
