AFRICAN GERMAN HEALTH ASSOCIATION

The African German Health Association e. V. wants to contribute to sustainably strengthening the health systems in Africa together with local actors. In doing so, the association works on a project-oriented basis to provide new impetus in both the digital and analog infrastructure in African partner countries with a focus on long-term success.

JOIN THE EFFORT

Together we are strong! The association invites all interested stakeholders from the public and private healthcare sector to participate in the activities, workshops, etc.

TOGETHER FOR STRENGTHENING THE ANALOG AND DIGITAL INFRASTRUCTURE OF THE HEALTHCARE SECTOR

SUPPORTED BY THE SPECIAL INITIATIVE ON TRAINING AND JOB CREATION

SENEGAL 2021 - 2023

www.african-german-health-association.de

SENEGAL 2021 – 2023

With a planned project duration of two years, the African German Health Association e. V. is working together with the Special Initiative Training and Employment on a broad-based project with the aim of jointly contributing to the promotion of the analog and digital infrastructure of Senegal's health sector:

**MULTI-STAKEHOLDER
APPROACH WITH PUBLIC
AND PRIVATE SECTOR**

INVEST FOR JOBS

Under the Invest for Jobs brand, the Federal Ministry for Economic Cooperation and Development (BMZ) has bundled offers to support companies in their employment-generating activities in Africa. The Special Initiative on Training and Job Creation offers advice, contacts and financial support to remove barriers to investment. The aim is to create good jobs and training places together with companies in currently 8 partner countries. The special initiative is implemented by the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH, among others.

www.african-german-health-association.de

ANALOG INFRASTRUCTURE

The analog infrastructure forms the basis of an efficient healthcare system. Integral subcomponents within the project:

- promotion of German-Senegalese cooperation in the design of the health sector,
- workshops and seminars on hospital planning (RIBA, design, architecture, medical technology planning, purchasing, processing ...),
- joint development of a hospital prototype,
- hospital staff matrix.

DIGITAL INFRASTRUCTURE

The WHO sees the digitization of healthcare based on global standards as an opportunity for African countries to provide effective healthcare across the board.

Integral subcomponents within the project:

- establishment of an IHE training system and training of local system administrators,
- training of local IT experts and key users,
- coordination for exchange with IT experts of the Austrian IHE-based healthcare infrastructure,
- usage-based expense allowance of local users of the IHE training system.

www.african-german-health-association.de

DIGITAL HEALTHCARE

Digital healthcare improves access to healthcare for many people in Senegal while offering attractive job opportunities for local IT talent:

- promoting German-Senegalese cooperation,
- corporate training on the use of cloud and AI in healthcare,
- joint development of pilot services with hospitals,
- training of IT professionals to further develop these pilot services.

EDUCATION IN HEALTHCARE

Sound education and training are the prerequisites for sustainable health care. Our project therefore focuses on:

- German-Senegalese cooperation in developing training concepts,
- workshops, seminars as well as training and further education in manual therapy, hospital management and healthcare,
- academic cooperation with African universities, educational institutions and professional associations.
